A real native wavefield evolving through Marmousi-II

New CPU illustration · true model · 39 × 101 cells · 90 m · 1 shot · FD8 · dt = 4 ms · float64

Panel a: star = source; outlined triangles = 25 receivers at z = 540 m. Shared scale across all frames.
Native staggered velocity before its update; physical domain shown, PML and top ghost cells omitted.
