
Known-Vs controlled experiment: fresh Vp sensitivity
Single gradient, not an inversion · shared linear P99 scale for old/new derivatives
a True Vp
b Actual initial Vp
c Fixed true Vs (known prior)
d Previous: blurred Vp and Vs
e Fresh: blurred Vp, true Vs
f Input ΔVp (not a gradient)
Depth (km)
Original x (km)
Vp (km/s)
Vs (km/s)
dJ/dθVp (objective / [m/s])
True − initial Vp (km/s)
